

# HEADPHONE AND BAOFENG UV-5R

Figure 1. Plugging earphones into \$6 baofeng microphone

The photo above shows how to use earphones/headset with the Baofeng UV-5R. You must plug the earphone into the 3.5mm (1/8") jack on the microphone – you can't plug normal headphones into a Baofeng unless they have the smaller plug, because of the jacks on the side of the UV-5r, the smaller one is the earphone – the 3.5 (1/8") jack is actually for the microphone as shown in Figure 2 below.

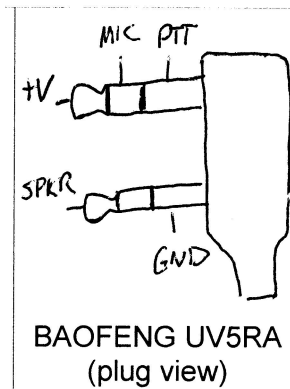

Figure 2: The plug and wiring that fit in the side jacks of the Baofeng.  
Note that the smaller connector is the earphone

## Product References:

Headset: <https://www.amazon.com/AVID-Education-AE-808-Classroom-Headphone/dp/B00B60FI1Y> \$14 – and includes the stereo/mono switch that will let you pipe audio from the transceiver into both ears
